Early-career Development Program

Climate Data Management Specialist

Discipline: Environmental Compliance and Resource Planning

Installation: N/A

Location: Fort Collins, CO (REMOTE)

of Positions Available: 1

Duration: Permanent

Annual Salary: \$59,000

(Prorated based on fte; this position is 25% fte)

Desired Start Date: 1 May, 2024

Position Summary

The Climate Data Management Specialist will provide support to the CEMML Climate Change Assessment program. This work will focus primarily on the maintenance, operation, and creation of R code programs designed to extract site specific CMIP5 and CMIP6 climate data at U.S. DoD installation scales and the production of tabular and visual outputs related to these datasets. Additional responsibilities may include general data management, maintenance of github repositories, and updating of potentially deprecated code modules. This is a flexible position, beginning at $\frac{1}{4}$ (0.25) FTE equivalent (roughly 10 hours per week), with the possibility of transitioning to full-time as desired and necessary.

Installation/Location Summary

The main offices of the Center for Environmental Management of Military Lands (CEMML) are based on the campus of Colorado State University in Fort Collins, CO. Located in Northern Colorado about an hour north of Denver, Fort Collins is consistently awarded on to the top places to live in the United States. The area is a perfect mix of city life and mountain accessibility.

About CEMML

The Center for Environmental Management of Military Lands (CEMML) at Colorado State University provides environmental management expertise to military installations and other federal properties across the continental U.S., Alaska, Hawaii, and overseas.

- Long track record of supporting military readiness and resource conservation—since 1985.
- Global reach with more than 700 staff embedded at more than 90 Department of Defense installations and other federal sites.
- Comprehensive experience in the development and implementation of cooperative agreements, grants, and contracts; more than \$100 million in projects each year.

About CEMML's Early-Career Development Program

CEMML's Early-career Development Program provides students, recent graduates, and early-career professionals the opportunity to learn more about land management in the military and federal lands context. ECDP positions are the perfect opportunity to build connections, be mentored, and gain hands-on experience. Working under the guidance of seasoned natural or cultural resource professionals, participants learn practical applications and techniques. Participants contribute to conservation efforts and increase their understanding of the regulatory framework and the complexities of managing natural and cultural resources.

Application Instructions

The application process requires candidates to state their preferred region and focus area, and applicants will be considered for all applicable opportunities corresponding with their stated preferences. Please note that a statement of qualifications, resume, and three references will be required. Please remember to speak to all your skills and qualifications as they relate to the focus area. Feel free to include the specific position(s) you would like to be considered for.
